

Emergent Space Technologies, Inc.

Position: Orbit Determination/GPS Engineer

Emergent Space Technologies provides cutting-edge engineering and information technologies to the aerospace industry. We are looking for an engineer, physicist or applied mathematician to work as a member of a NASA Earth Science team at the Goddard Space Flight Center in Greenbelt, MD. The candidate will work on GPS-based orbit determination related projects and they must have a strong background in statistical estimation theory, orbit dynamics, and GPS. The candidate must be able to work in a team and be a fast learner. The candidate must have a strong background in FORTRAN software development and maintenance and in UNIX or PERL scripting.
